fiskaltrust.
partner

all-in-one
fiscalization
system for your
cash register

fiskaltrust.

freemium service with add-on products
for automation and premium packages
for higher security

your challenge

cost-effective fiscalization, according to national law and technical regulations with required hard- and software

the solution

country-specific technical service for receipt chain, signature, encryption, QR-code, data collection log, ...

our freemium products

fiskaltrust.portal for user-management, and webshop for online-archive and products for automation, ...

legal requirements

cash register creators are software developers, not lawyers. the challenge is, to make the legal fiscalization according to different EU-laws. this has to be as cost-effective as possible.

fiskaltrust has all the legal and technical competences to make it easier for many satisfied PosCreators, PosDealers, consultants and PosOperators.

[call us now](#)

fiscalization system

fiskaltrust offers a license-free interface, the fiskaltrust.service and provides the offline- or online-fiscalization of cash registers and labelling systems.

depending on the system-technology, the standardised middleware can be used in different ways to enable the optimal performance and scalability.

add-on products

we support developers and large companies to fiscalize their systems in compliance with tax regulations. the system is easy to implement and offers a perfect scalability.

the fiskaltrust.portal, which can be used free of charge, supports our partners in the rollout to their costumers and to configure and manage all free and add-on products.
